DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/20/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Knapp (US 4152046).

Knapp shows a light reflector including a hollow cylinder (see fig. 7) having an outer surface(41,51) for receiving and

reflecting incident light and an inner surface on which a plurality of multi-faceted light reflecting cones (45,60) are formed (see also col. 3). The recitation "for personal items" is a statement of intended use which does not further limit the present invention in a structural manner.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baravaglio shows a hollow cylinder with reflecting cones inside. Brudy shows a hollow body which is nearly cylindrical and includes a plurality of light reflecting cones on the inner surface. O'Donnell shows a hollow cylinder with reflective structure on the inner surface.
